Amendment

Sir:

In response to the Official Action dated 14 March 2003, Applicant courteously requests entry of the following amendment.

The Specification has been amended to insert data in the paragraph beginning at line 2 on page 3 which was not available at the time the application was filed.

The only claim has been amended editorially to avoid phrases which could *arguendo* been interpreted as ambiguous.

Remarks

The only claim of the instant application stands rejected under 35 U.S.C. §102 in light of U.S. Patent 5,696,550 - Aoki et al., it being the Examiner's opinion that "Aoki et al teach of a improving the accuracy of the measurement by calibrating the location of the pixels by measuring the individual deviation of the pixel site from the desired pixel position."

The Examiner appears to have misinterpreted either the teaching of Applicant's invention or the '550 patent. The latter teaches, in two embodiments, an LCD panel image quality inspection system by using a defect determination system for determining defects based on the contrast data of each LCD pixel obtained as the image of the LCD
